

Name:	Middle name:	Surname:	Born:	Date:
_DEMO		_TrichoLAB	31/05/1995	03/06/2016

Statistics:

	Frontal area	Temporal area	Occipital area
Average number of hairs [N/cm ²]:	238	269	242
Average hair shaft thickness [μm]:	66	66	61
Thin (≤ 30 μm) hairs [%]:	5	7	11
Mid (30 - 50 μm) hairs [%]:	15	17	20
Thick (≥ 50 μm) hairs [%]:	81	76	69
Single follicular units [%]:	7	2	12
Double follicular units [%]:	26	14	26
Triple and bigger follicular units [%]:	67	83	62
Empty hair follicles/yellow dots [N/cm ²]:	4	6	4
Cumulative hair thickness [mm/cm ²]:	13.6	15.9	12.5
Number of follicular units [N/cm ²]:	87	69	85
Derived Sinclair Scale:	1.9	1.6	2

Conclusions:

On trichoscopy - hair count, mean hair shaft diameter, distribution of hairs within hair units within normal limits, scalp skin - normal. Presence of normal number of short upright regrowing hairs representing physiological hair regrowth.
